(54) Title: A PAYROLL DEDUCTION SYSTEM AND METHOD FOR USING THE SAME

WO 01/57813 A1

(57) Abstract: A system and method for using an e-dution card as a payment instrument, whereby a purchase price of articles purchased on-line or off-line is deducted from an employee's paycheck. The e-dution card is similar to a credit card but is not bound by the same terms and conditions of a credit card. Merchants sign up with the inventive system and agree to accept the e-dution card as a payment instrument. A magnetic stripe on the e-dution card stores an employee's account information. When a consumer purchases a product and uses the e-dution card as a payment instrument, the account information on the e-dution magnetic stripe is transmitted to a network processor with access to information stored on the database. The processor verifies the employee and merchant status, and the employee account information in order to approve or reject the transaction.

TITLE: Payroll administration system debits pooled
clearing
account and sub-account of authorized employee,
by
amounts of payments authorized against funds in
accounts

----- KWIC -----

Basic Abstract Text - ABTX (1):

NOVELTY - An administration facility (2) credits a pooled clearing account (5) and a sub-account of an authorized employee with an amount of a net remuneration payment for the employee. A user access facility (6) allows the employee to authorize payments against the funds in the accounts. The administration facility debits the accounts of the employee by the amounts of authorized payments.

Basic Abstract Text - ABTX (2):
